Professional Experience

StraitsX - DevEx/Backend Engineer

Sep 2023 – Present

StraitsX (Fazz Financial Group) operates regulated stablecoin payment infrastructure (XSGD, XUSD, XIDR) across Singapore and Southeast Asia.

- Reduced CI runtime by 61% across three Rails codebases through profiling and test-suite optimization; patterns adopted as engineering-org standard.
- Led AWS ElastiCache migration for payment service from Singapore to Jakarta region, reducing latency and improving security compliance.
- Upgraded Ruby services from 3.1 to 3.3 with YJIT in Kubernetes, reducing p90 latency by 23% and improving CPU efficiency by 15%.
- Identified and fixed inefficiency in payment routing logic, reducing fund-transfer infrastructure costs by ~\$33K/year.
- Maintained Go microservice for payment processing alongside Ruby services.

Scala Center (Google Summer of Code) - Software Engineer

May 2024 – Aug 2024

Scala Center maintains the official Scala programming language toolchain and open-source ecosystem.

- Contributed to Scala-CLI, an official Scala Center open-source build tool project for compiling Scala code.
- Implemented source code generation for Protobuf and Smithy data schemas in Scala-CLI using Scala and Bloop.

VideoLAN (Google Summer of Code) - iOS Engineer

May 2023 – Aug 2023

VideoLAN develops VLC Media Player, a widely-used open-source multimedia platform with billions of downloads globally.

- Contributed to VLC iOS, a multimedia player that supports local media and streaming media protocols.
- Implemented a feature for storing favorite content on SMB/UPnP media using Objective-C and Swift.
- Deployed a fix for restoring video playback on SMB/UPnP media using VLCKit.

Apple Developer Academy @ BINUS - iOS Engineer

May 2022 – Dec 2022

Apple's flagship 10-month developer education program in Indonesia (≤200 learners/cohort), focused on iOS development, human-centered design, and challenge-based learning.

- Led a team of 3 iOS engineers as Tech Lead on a social Indonesian-based RSVP app built with UIKit.
- Shipped an iPad-first educational app teaching K-12 students basic arithmetic through interactive storytelling, built with UIKit.
- Selected as 1 of 350 global winners of the Apple WWDC 2022 Swift Student Challenge.

Education

Bina Nusantara University - B. Eng in Informatics

2019 - 2023

- CGPA: 3.52/4.00
- Relevant Coursework: Data Structures, Algorithms, Software Engineering

Projects & Achievements

LearnTactics

Football tactic development app for iPad that was selected as one of the winners for Apple WWDC Challenge.

Google Summer of Code Participant in 2023 and 2024

Accepted in VideoLAN as an iOS Engineer in 2023, and accepted in Scala Center as a Software Engineer in 2024

Apple WWDC 2022 Swift Student Challenge Winner

Accepted as 1 of 350 winners globally in Apple's app development contest for Swift learners.

Skills

Languages:	Ruby, Go, Python, SQL (PostgreSQL, MySQL)
Technologies:	Ruby on Rails, FastAPI
Skills:	Git, Docker, Kubernetes, AWS (S3, ElastiCache, EC2), CI/CD
